## About the Workshop and Training

In rural area every school has children with different learning styles and needs. One-size-fits - all methods of teaching are not successful especially when one is intending for the children to learn for life. It is absolutely essential for a 21st-century teacher to re-invent, to experiment and, to explore new methods of teaching.

The development of any nation is measured not only in terms of the convergence of economic policies but also in terms of the education policies along with social conventions particularly in rural area. Thus, the Policy on Education popularly known as National Education Policy 2020 (NEP 2020) was introduced with the aims to improve the education system and quality of school teachers.

The primary objective of this Workshop and Training is to provide the required knowledge and tools to school teachers of East & West Jaintia Hills District about the changes of the educational system as per NEP 2020. In this programme, the academicians, expert and teachers will sit together for a thorough deliberation and discussion for understanding of the new changes for effective implementation of the policy in the State.

## Sub-theme

- *Role of teaches in Personality Development of students*
- *The needs and importance of Blue-Print in teaching process*
- *Basic Teaching Skills for elementary school teachers*
- *Application of Psychology in the teaching learning process.*

## Registration

All invited school teachers need to register at the venue at 9.30 a.m.
